

## Let's take a look at the appeal of B-to-B companies and the heating facilities that work in factories that you can't normally see!

Industrial heating equipment is not seen in daily life as a factory facility.

However, heating is a very important and necessary process.

Don't you feel the back side of the heating equipment?

### What do you want to learn in this Internship program ?

I would like to know and feel the working environment at ECOM company. Additionally, I want to know what kind of process is going on through to manufacture wonderful equipment by employees.

### ECOM Internship program

1<sup>st</sup> Day AM : Company Description

1<sup>st</sup> Day PM :In sales department

- A work test using a heating device.

2<sup>nd</sup> Day AM :In design department

- Draw a something using 3D CAD.

2<sup>nd</sup> Day PM :interview with a new employees

- A discussion with a employees about ECOM

### What did you think about ECOM ?

1<sup>st</sup> DAY: ECOM is an interesting company.

It's not just manufacture of thermal equipment but also maintenance company.

I was really impressed when going to the factory and see many furnaces and explained how it works. ECOM's employees also kind and welcoming me.

### Message from employees 1stDAY

She could speak English well. I could see her actively asking questions about her concerns.

As she had used similar equipment in her research at the university she belonged to, she wanted to participate in an internship, and she seemed to be clear about her interests and what she wanted to be.

## What did you think about ECOM ?

**2<sup>nd</sup> DAY :** I visited the purchasing and design, assembly department. It was really impressed for me and really interesting. I got many new knowledges, how to design 3D CAD, how the heat machines work, what are their functions. I really appreciated. Then from talking with new employees, It was really nice I could get many information about job training and job hunting. It was really nice conversation.

Internship report2020

## Message from employees 2<sup>nd</sup>DAY

I think she experienced 3D CAD for the first time, and I am glad that she was able to respond flexibly to unfamiliar tasks, and that she was interested in many questions about the design. We felt very enthusiastic about getting something from her through this experience. No matter what job you take, I feel that your attitude to make the most of your limited opportunities in the future is a great advantage.

# ECOM

## What I felt through my two-day internship

For those two days, I really happy and grateful because I chose ECOM for Internship. I had got so many new knowledges and experiences. All the staff here are so nice. Also I wanted to improve my Japanese.

## Message from Internship Manager

It was impressive that she was very polite and good at greeting and reconciliation. I thought it was wonderful to feel that we could both enhance by working together.
